

Method on Instagram 2.0

The next method is about investing.

Get an investment around 20-60\$.

Teespring account

Canva

Okay, you can do 2 things with this. Sell the t-shirts directly to the Instagram pages. So let's say you made a really good design then you can sell ownership/account to the person.

Or ask how much a shoutout is.

Listen you can get easily scammed so.

Some precautions.

Make screenshots of the conversations. Once they sent their Paypal email.

Always sent Goods and services, how legit/big the accounts are.

Once you made a design and paid to sit back and wait for the money.

I recommend you make a really good design or pay someone to.

It's really easy, to decrease the price just be eager.

Ad will have to be targeted on emotions, like when Kobe Bryant died.

PART ONE What is this method? This is a no-bullshit method. We will be doing something called arbitrage betting also known as "Arbing / Arb bets".

An arbitrage bet is where we bet on both outcomes of a bet on different sites that have different opinions of an outcome of a match.

This guarantees us a profit of 1-10% on every bet we place. There is no risk in arb betting since you will always profit no matter the outcome of the match. I calculated the current profit from October the 1st to October the 27th and it was a 39% ROI if you bet on every opportunity available.

Here are the profits: 50\$ Investment = 19.5\$ profit 100\$ Investment = 39\$ profit 200\$ Investment = 78\$ profit 300\$ Investment = 117\$ profit Etc. PART TWO How do I place these bets?

The first thing you're going to want to make an account on the following websites. -Sportsbet -Cloudbet -Nitrogen -BetBTC -mBet -OneHash -1xbit -Betcoin -Bitcoinrush -Fortunejack -Anonibet

Then you want to go here <https://twitter.com/bitedgecom> this is where we get our bets from. Here's an example of a bet For the first bet you bet 59.3% of your investment on Sportsbet on Borussia Dortmund for +0 handicap For the second bet you bet 40.7% of your investment on Cloudbet on Schalke 04 for +0 handicap The average profit will be 2.06% so you will profit on both bets no matter what happens during the game.

You also want to follow that Twitter account and turn on notifications so you can bet any time one of these arbitrage bets come up.

If you do every bet possible and bet the investment + the profit from the previous bets you will see your BTC balance go up by around 20-40% a month.

Mate listen, making money online is really hard if you don't have anything stable. I recommend you are 18 years or older. (ask your friends if not)

In summary:

- get a teespring design, invest in an instagram page and rinse and repeat
