# INTRODUCTION

I would like you to give yourself a pat on the back for purchasing this eBook and taking the FIRST step towards becoming financially independent online. 90% of the people who read the sales thread will simply not purchase this ebook in spite of the money back guarantee.

It is not because they are afraid that method won't work. But, they are afraid to invest in themselves! This just proves that you are not average and you have a dream and desire to not live a mediocre life.

I want you to do EXACTLY what I tell in this eBook.

The reason I created this ebook is, when I was starting out, I had no resources, no help from anyone. I had to figure out everything myself which took me a long time.

But, since you bought this method, you are lucky to get a *shortcut*. I promise that this is ASSURED to work. If it doesn't, then as I said in my thread, all you have to do is show me proof that you are taking action and I will send you a refund if you got the deluxe package.

BUT, please note that if you don't take action after reading this ebook then the money which you spent in purchasing this will go to waste. It doesn't matter how much knowledge you consume, but what matters is the amount of **ACTION** you take.

## “I don’t know anything” Dilemma!

When you are just starting out to make money money, you are likely to not have any knowledge about advanced stuff like funnels, ecommerce, or all those fancy words. Heck, even if you understand them, then it requires a huge amount of money to actually succeed with it. And, if you are reading this, chances are that you may not have that kind of money yet.

The single best way (in my opinion) is to do affiliate marketing when you are starting out. Affiliate marketing is basically when you are selling other people’s product in exchange for a commission.

This way you **don’t** have to handle all the complicated stuff like:

- Customer support
- Refunds
- Shipping
- Payment integration (Spoiler alert: Payment processors are a nightmare!)

I can keep going on, but you get the idea.

I’ll be teaching you the BEST way to do affiliate marketing when starting out and quickly make upto \$300/day or even more than that, using a special method which I will tell at the end of the ebook.

Anyway, did you know that you can do affiliate marketing on almost any website including Amazon? All those links which you see in youtube’s descriptions are likely to be affiliate links and the youtuber gets a commission whenever you purchase from that link.

The cool thing is, many websites like amazon store a “cookie” inside the browser when someone uses your special link. So for example, if the person does not immediately purchases the item, but comes back after 100 days, you STILL will be eligible to get the commission because of these cookies.

# “TOO MUCH INFORMATION. HOW DO I GET STARTED?!”

I know that affiliate marketing is a VERY huge field and there is SO much information out there which will just get you confused as you will suffer from “information overload”.

I don't want you to go through the trouble of finding the *golden nuggets*. Instead, I will share everything.

So, we are going to promote web hosting offers.

Web hosting is basically where your website is stored on the internet. Every website requires hosting and domain (name of the website).

Hosting providers usually pay around \$60 to \$120 per referral. Let's do some calculations:

- 1)  $\$120 * 3 \text{ sales} = \$360/\text{Day}$
- 2)  $\$360 * 31 \text{ days} = \$11,160/\text{month}$

Now you know that it is NOT small amount at all.

Some good affiliate programs for web hosting are the following:

- 1) [Siteground](#)
- 2) [Bluehost](#)

Some hosting programs might pay more than what above ones are paying, but I believe that you should suggest the BEST ones only to your customers. If you suggest a shit one, then it's quite unethical as you are solely focusing on profit and not on the bigger picture. So, sign up for one or both and in the next chapter, I will cover how you are going to promote them to start seeing results from as soon as day one.

## BEST way to get traffic/clients! (Step 2)

So why would someone purchase web hosting from our affiliate link?

Think about this. Web hosting is something which ALL the websites need. If all the websites need it, then it means, the demand is very huge in the market for it.

What I want you to do is, **ethically bribe** your clients.

Offer them to create a free website in exchange of using your link. *(I will teach more about this in next chapter)*

Now I'm assuming that you already have signed up for the affiliate program of either bluehost or siteground and now is the time to start putting the offer in front of many people so they can contact you about it.

The best and high converting (meaning which will make you most sales) traffic is actually **FREE**.

- Facebook Groups. (This is **GOLDEN!**)
- Instagram
- Forums
- YouTube Channel Owners
- Reddit (**Another golden nugget**) (**One of my posts on reddit got viral, and I got 200+ messages on SAME day**) \*Reddit has added chat feature also so it is easier to talk to prospects!

You have to pick one niche and target it. Here are some examples:

- Fitness trainers
- Real Estate Brokers

- Network marketers
- People who are looking for blogs/online portfolios.
- Consultants
- MLM
- Influencers

An example of post would be something like this. But do **NOT** use the same one. Be creative and make some changes to it:

*“I will setup a full WordPress website for free. Any website you need (can be a personal blog, photography portfolio, company website), I will make for you. If you’ve ever wanted a running website but didn’t know where to start, I’ll guide you through the whole process. We’ll hop on a call together and within 24-48 hours I’ll get your entire website up and running!”*

PS: (Don’t freak out about the “free” website thing. In next chapters, I will teach everything you need to know about setting up a website using wordpress)

### **Paid Traffic Method:**

Run a paid facebook advertisement and target a specific interest. For example, if you are targeting personal trainers, you can put “job title as personal trainer” and it will only display the ad to personal trainers.

If you use the paid traffic method, clients COME to you. Isn’t that amazing?

Anyway, I won’t suggest to use paid ads because you can lose alot of money quickly if you don’t know what you are doing. Start with the free traffic method, once you make at least \$1000, start putting small amounts of money into facebook ads and see the response.

If you want to learn FB ads, I suggest to watch [Ben Malol’s](#) videos on youtube.

(Link: <https://www.youtube.com/watch?v=y8WISIK0Yj0>)

## How to talk to your prospects

Now you have wrote a post on facebook, or maybe you decide to message someone on instagram/youtube and they have responded.

What do you do next?

Don't sound like a robot. Here's how a typical conversation with my client goes:

**Me:** Hey [Name]! How are you doing?

Prospect: I'm doing good, thank you.

**Me:** I noticed that you commented on my post where I'm offering to build a free website.

Prospect: Yes, I actually need a website for...blah blah.

**Me:** Great, I can help you out! do you already own hosting and domain?

Prospect: Nope. *(If they say yes, just ignore/block him/her)*

**Me:** Well, these 2 things are required to build a website. Though, I can suggest you

where to get them from?

Prospect: Sounds great!

**Me:** You can use the [Affiliate link] to get both of them from. You will get killer deal because of [x] and [x]. But, just to be transparent, it's my affiliate link so I will gain a tiny commission. Is that okay with you?

*And so on!*

It has worked 90-95% of the times for me so there's no doubt that it won't work for you.

The reason it works so well, because of the following reasons:

- 1) You are building trust by being upfront about the commission you are receiving.
- 2) You are enticing them by the "killer" deal which is only available from your link.

- 3) Finally, they have to purchase the hosting anyway. Might as well, purchase from your link as they are getting the whole website for free!

Now you must be thinking:

*“I don’t know how to build websites! It is too complicated and tech-savy for me”*

Nope. Those are excuses. Web hosting comes with this thing known as wordpress.

With WordPress, you don't need to know coding. When I started it did take me a bit long to build websites, but now, I can build within 30 minutes since I have experience and I got better.

Let’s say you are building a website for a personal trainer. Then you can go to youtube and search “How to build wordpress website for personal trainer” and you will get a video which will teach you EXACTLY what you need to know.

So, you don’t need to *learn* anything before getting the first sale. Many people make the mistake of learning “*everything*” of which they don’t using anything when the sale comes.

If you are still skeptical then setup a website for yourself. If your name is John Santos then you can create a website with domain name as JohnSantos.com where you can use the website to build a portfolio or just for blogging purposes.

It will increase your confidence about making websites and you will see how easy it is!

Here are some GREAT youtube videos to learn wordpress from:

<https://www.youtube.com/watch?v=-MF-epBurAE>

<https://www.youtube.com/watch?v=8OBfr46Y0cQ>

<https://www.youtube.com/channel/UCZpkfpfGe2ZC3AIQ69ERCJw>

Youtube is ENOUGH to learn wordpress. That’s how I got started.

# What you have learned so far!

You learned how to market.

You learned how to talk to your customers.

You learned how to promote yourself.

You learned wordpress, an amazing skill which all the businesses require to build their website.

You learned how to leverage affiliate marketing.

These skills will stay with you, and ALWAYS help in your future your businesses (assuming you want to be an entrepreneur).

Even if you don't want to be an entrepreneur, this is still a great method to make money.

## You did this!

PLEASE treat this like a real business. Don't half ass it. When you put in 1-4 hours everyday, I want you to be focused.

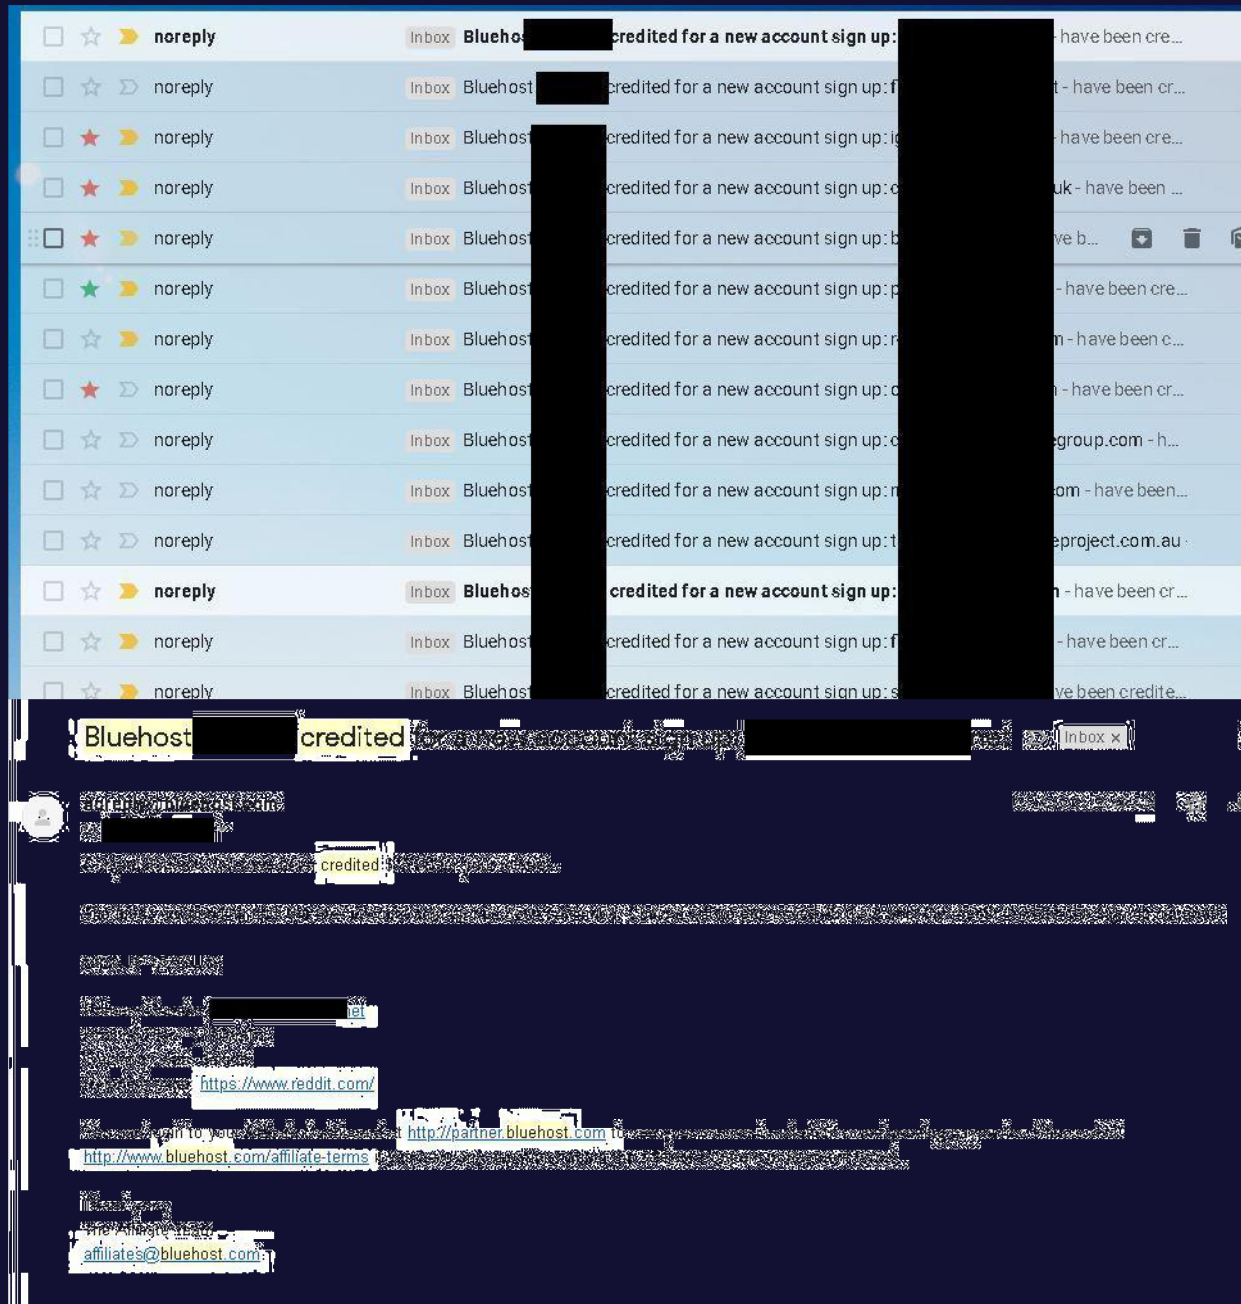

Read this ebook 2-3 times more, go through youtube videos and contact me if you **still** have questions. Before contacting me, I want you to google your question (I don't say that in an insulting way) but this a great habit to develop, from which you can learn faster.

Once you make your first sale, don't forget to post a screenshot of it on the sales thread. You will be surprised how fast you will make money with this method!

Good luck with your journey!

Now go and MAKE some money.

If you are still skeptical if the method works or not, here's how my email account looks like:

Again, I don't want to brag but I just really want to show you that this method **WORKS**.

## BONUS METHOD (SECRET SAUCE)

Once you make some money with this method, you can actually outsource everything. For example, you can hire people from third world country off upwork or onlinejobs.ph (freelance website) to setup the websites. They will charge 3-5\$/hour.

You can hire someone to promote offers on FB groups, instagram. Again, 3-5\$/hour.

This means that it will open a new stream of income for you on the side without working for even an hour.

BUT, I definitely DON'T suggest you to outsource when you are starting out. I believe that you can't delegate if you don't have the knowledge of the work yourself. For example, if you hire someone to build a website, you won't be able to determine it looks good or if it looks bad. You need to do them yourself first to gain experience.

## TIPS

### **Don't give up.**

As cliché as it sounds, it can actually be a bit difficult to get your first sale. But once you get the first sale, everything will look easy. Trust me, it's much easier to go from 1 sale to 10 sales than going from zero to one.

### **Learn about selling.**

The way you talk to your clients, the way you post the offer will determine your success with this method. I would HIGHLY suggest to spend your time in learning how to sell. Watch YouTube videos by Jordan Belfort, Valuetainment.

Learn how to persuade and influence people. Read the following books.

1. How to win friends and influence people.
2. Cashvertising.
3. Zig Ziglar Selling 101.
4. Dotcom secrets by Russel Brunson (Runs a \$100 million dollar company)

### **Be creative.**

Surprise me. Go after niches which I don't even talk about in this ebook.

**Make your work easier.**

Once you make \$100, I suggest getting Divi (or elementor) developer package. Divi is a theme which provides drag and drop feature to make websites. This really is a goldmine, in my opinion. If you have extra money, please get this. This will make your life so much easier.

**Make your work easier. (2.0)**

Hire a VA off upwork or onlinejobs.ph - someone who can take care of posting on facebook and talking to clients. You will pay 2-5\$/hour and your work will get even more easier. The only thing you will care about is making websites then.

**Learn English.**

Please, please, please do not talk to your clients with "hiiii" or emojis.

Use proper grammar and sentences. If English not is not your native language, I would suggest you to learn English by watching American TV series like Suits or by reading grammar books.

By the way, English is not my first language but I feel like I'm good enough to talk to clients from anywhere in the world.

**Make a script.**

Once you make your first few sales, notice how you were texting/talking with the client. Use those same words and phrases in future. This will make your work easier!

## FAQ

**Q:** I'm signing up for bluehost/siteground and it asking for website. What do I do?

**A:** Put NA.com in it. It stands for not applicable. If the hosting company contacts you about it, tell them what you are doing and why it does not require a website.

**Q:** I signed up for bluehost/siteground but it asking for tax form?

**A:** You can fill it if you are under 18. It requires only basic info like address, name etc.

**Q:** How do I write posts on facebook/reddit?

**A:** Be creative. Try writing in different ways. Customize the example I have provided in the ebook. See which one gets most responses.

**Q:** Which is the best "traffic source"?

**A:** Test, test, test. See which one works for you.

**Q:** I don't understand "x".

**A:** Google it. Youtube it. Still don't understand? Message/email/skype according to the package you bought. Please understand that my time is valuable and it might take me 24-48 hours to reply to your query.

**Q:** I want refund.

**A:** If you bought the deluxe package, and you have tried EVERYTHING inside this ebook, message me. I will ask for proof like screenshots of conversations and posts you made. First, I will try to help you by improving them but if you still can't do it, I will refund.

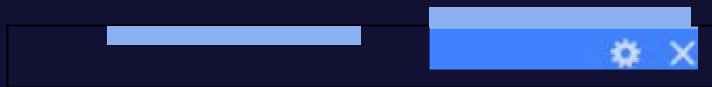

If you are lazy fuck and don't want to try the method and still want refund, don't bother messaging me. It took me months to gain experience, and days to write this ebook for you.

**Q:** I buy this ebook, I leave a negative review and chargebacked. Why are you not helping me?

**A:** Do not leave a negative review or chargeback on paypal without talking to me first. If you do either of those, I have the rights to provide you **ZERO** help afterwards.

## How I made my first sale

I personally got my first sale using reddit. I made a post, and then told the client (realtor) to talk on facebook. Here's how the conversation on facebook went:

MAY 23RD, 12:46PM

Hey ' z J! I'm from  
/r/.here we  
talked about creating a  
website for your real estate  
business

MAY 23RD, 7:17PM

hey! Thank you for helping  
out. I have been meaning to  
set up my website for a  
while. Let me know what the  
next steps should be!

fB % O=' 0 @ Oo

Right. First of all, do you  
have a hosting and domain  
name?

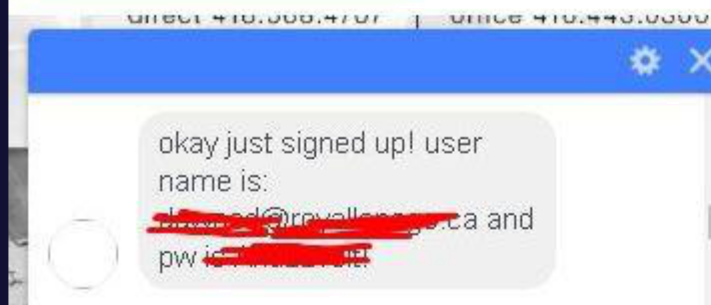

If not, please get them from  
this link  
[www.bluehost.com/track/c-1](http://www.bluehost.com/track/c-1)  
- The \$4/month  
package works great. It  
includes a domain name too!

Drop me a message back  
with bluehost login details so  
I can start working on the  
website.

PS: Domain name is the name of the website, whatever you want to call it. For example,

~~Example~~ RealEstate.com. And hosting is where the website is stored on internet

P.S.S. Just to be 100% transparent here, I'd like you to know that I'm affiliated with the hosting company, so I will get a small commission of your purchase.

**Boom. This was my first \$65 using the method!**
