

Make money via Instagram

Okay, what you should do is get an Instagram page.

Requirements:

A brain

RDP or pc that could be on 24/7

Jarvee.com

First, buy on an account on accsmarket.com (Cheap)

Get an rpd from ANYWHERE (Try your school account)

Jarvee (Use the 5 trial shizzle over and over (delete cookies every time)

Once you got an account it's time to get some proof for your page. This is really easy. Go on Instagram and search for betting pages. Once you found pages press right click and copy the address. Then head over to <https://downloadgram.com/> and install their photos and proof.

Then simply add their photos on your account. Copy and past their bio etc. Once you got a page it's time to get costumes? How are we doing that?

Install Jarvee, Sign up, etc. (You could literally watch a video)

Go to your page, then extract users, then "Followers" and pages like Unibet. So it will be something like "Followers Unibet". Add up to your preference. I usually add 5 accounts for 50 accounts each. Then you will sent a message to people.

It can be anything. I will not tell you what to write as it's your own preference. Believe me, these people do have the money.

Where do I get my bets from?

<https://www.punterslounge.com/tips/free-football-betting-tips> <https://www.bettingtips1x2.com/>

<https://www.olbg.com/betting-tips/>

What if the customer won't pay? (not really a customer tho)

It's simple to tell them, Yo bro, you can earn your free odd. Ask for their country go to a CPA page. Pick the highest offers one and done.

IF your bet isn't right, tell the customer they get one for free.

They are paying for fixed matches, we are not scamming them. We are trying to make money from people that bet.

In summary, what you will do is:

Create a page, post payment proofs, message people via the bot.
And sell fixed betting matches you find for free.
