

## **Shopify Store (Investment needed)**

Okay, first head over to Exchangemarketplace.com (Filter the stores to Dropshipping) Search for what kind of stores are selling and how much from they are selling for. Find a shitty store selling for UNDER \$150. Once you found a store go ahead and make an offer. Once the transaction is successful. Then execute the steps.

1. Setup gateway payments
2. Then order products from your store. You'll need 2 accounts, It could be Stripe, Paypal.
3. Then add FAKE traffic to it. It could be Hitleap or a diabolic traffic bot.
4. Then list the store on Echangemarketplace.com

\*The only fking thing on Exchangemarketplace.com is if you execute the method. Then you'll have to wait until the end of the month (second day) because then it takes data from last month.

You can also create a store yourself and go from step one.

High paid themes:

<https://drive.google.com/open?id=18lO0rPid4N-2l9Qa1Oqi9mCiZjovDFB9>

Basically you buy yourself etc. To show that your store has activity (buyers, etc.) and you will sell your store for a reasonable price.
