INTRODUCTION

With **Zuper Earnings** you will learn 7 different methods to earn totally legal money. The purpose of this ebook is to teach the buyer to obtain totally legal income in this way you do not have to be worried that the police will knock on the door of your house. These 7 methods are unsaturable and cannot be patched either. You can practically do these methods for the rest of your life and earn hundreds of dollars.

Terms Of Service (TOS)

- I am not responsible for the misuse you make of this ebook.
- Resell/Trading/Leak of this ebook is strictly prohibited. You bought this book for yourself and only for yourself.
- This ebook was created for educational information only, I am not responsible for the misuse you make with it. (The ebook is completely legal, but this is to demarcate me from any misuse they make with this.)

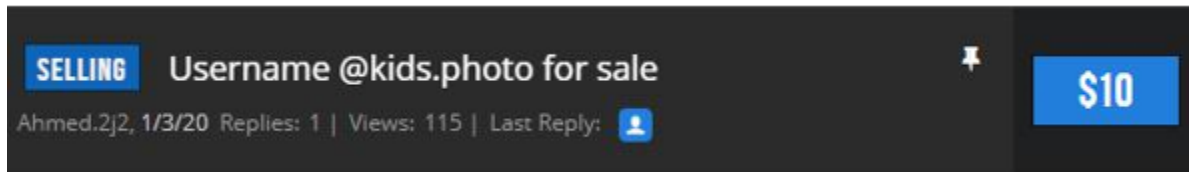

Method #1 – Instagram OG Reselling.

What we will do with this method, is we will look for OG (rare) names in Instagram for sell it, if you try several times, you will earn good money.

EXAMPLES:

I found someone who sells "kids.photo" on:

<https://www.playerup.com/accounts/oginstagramusername/>

If we search "kids photo" on google we are going to find a website called classic kids

"Classic Kids": <https://classickids.com/>

They have an Instagram account either:

But, unlike the domain, their Instagram account doesn't have a good name. Therefore, if we take that in our advantage, we can offer them to buy "kids.photo"

Now you can offer them \$500+ for the username, and here is you

\$490+ PROFIT \$\$\$

In some cases the price is not so high. Keep in mind the appearance of the page, quality, buyers, and all those things and put an appropriate price on the name. And when you contact them, tell them that This name is more attractive so it will help them get more promotion and better profits.

Method #2 – Hypebeast reselling

In this method we will be reselling popular hypebeast brands like Supreme, BAPE, Palace, etc.

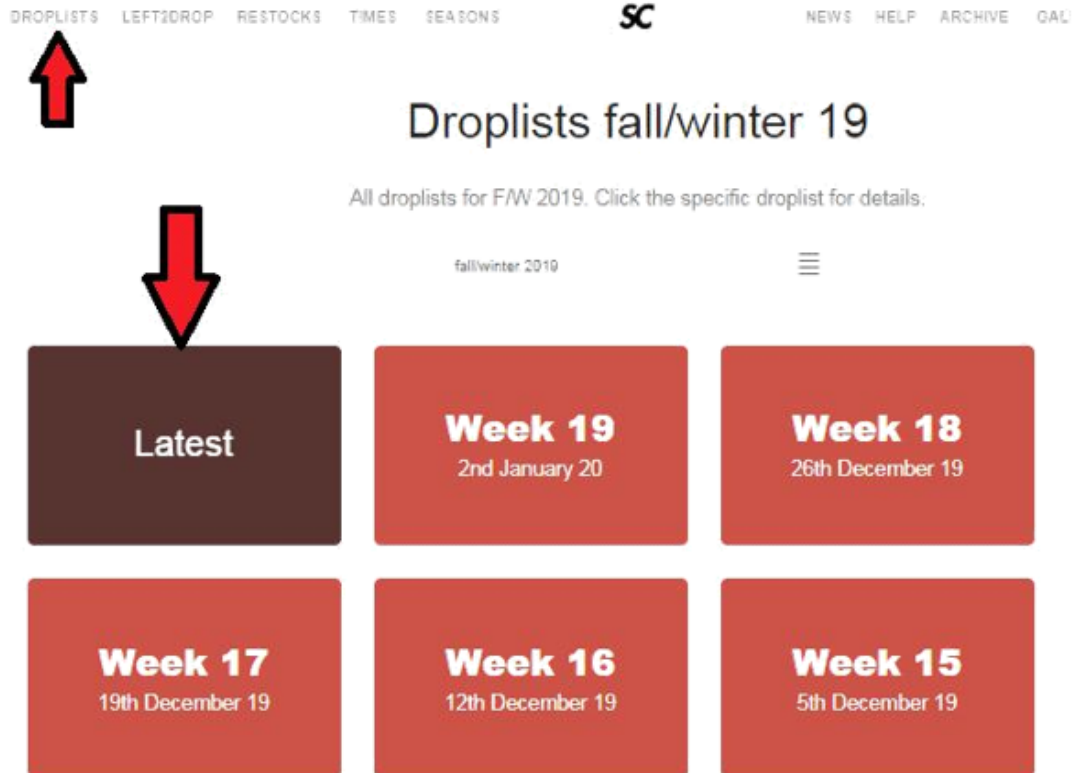

First of all, head over to <https://www.supremecommunity.com/>,

<https://twitter.com/dropssupreme>

<https://www.instagram.com/supcommunity/> so you can familiarize yourself with all the drops, prices, times, etc.

Now that we've done that, we need to familiarize ourselves with what are the items people are looking to buy and ones that they don't want.

Go to <https://www.supremecommunity.com/>, click on Droplists -> Latest.

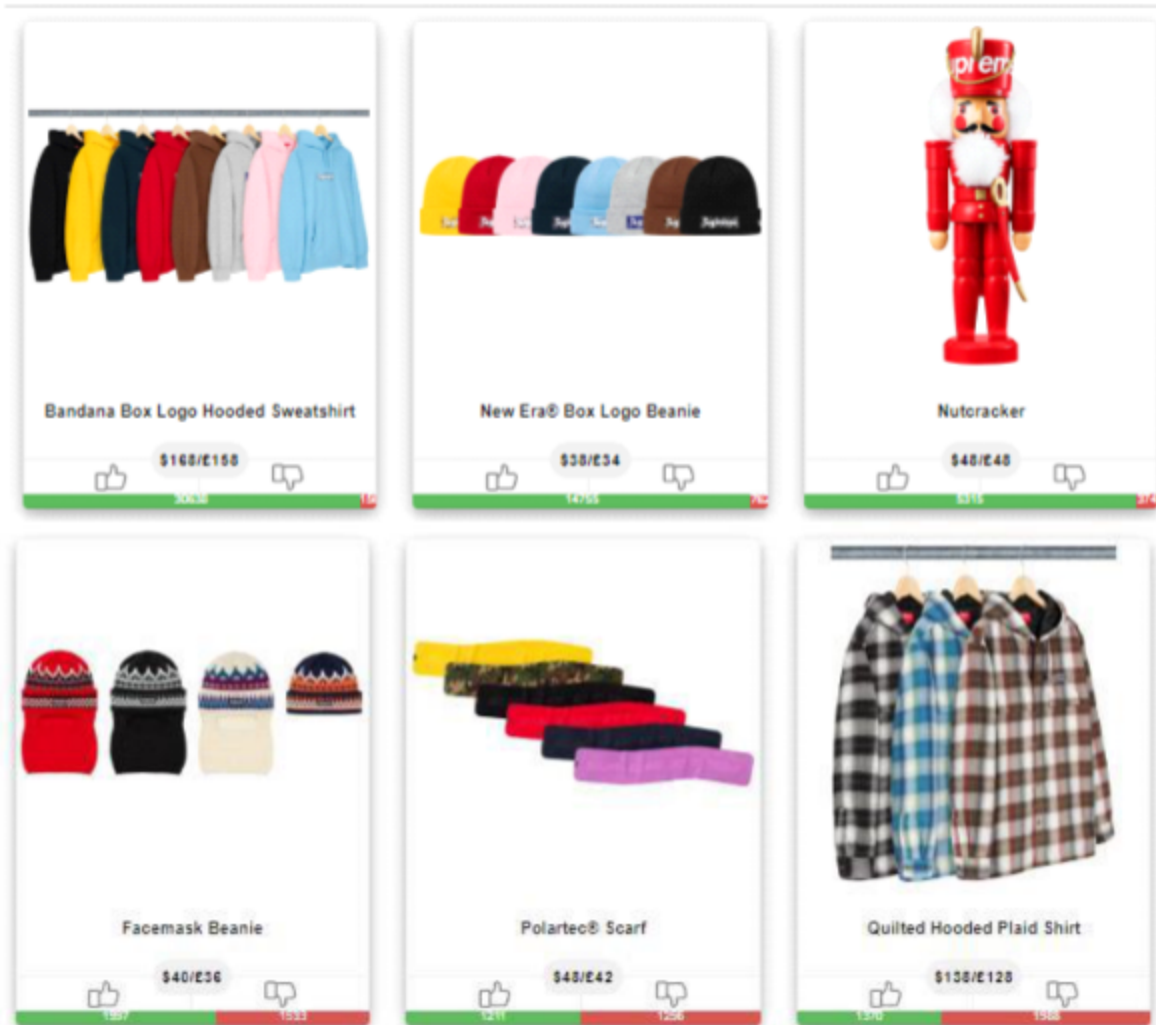

Here we can see people's votes on items, ones they like, they don't like, etc.

There are no items on latest so i'm gonna give you example from another collection !

We can see that Bandana Box Logo Hooded Sweatshirt is extremely popular and a lot of people are going to try and get it.

On the other hand, the Quilted Hooded Plaid Shirt is not really popular, meaning not a lot of people want to buy it.

So, the hooded sweatshirt is \$168, we don't need to go straight to it if we don't have that much to invest, we can go for Nutcracker.

After we've done that, we will need a Supreme bot, which will purchase items for us. Supreme items get sold out within seconds (literally), it's almost impossible to "manually" purchase it - however you are more than welcome to try.

2 of the most popular bots are HyperCop and Copbot:

HyperCop (\$150): <https://hypercopbot.com>

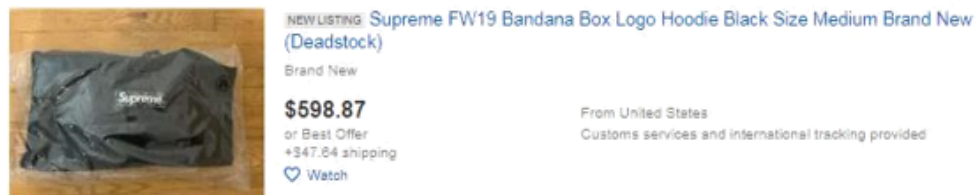

ForceCop (\$80): <https://forcecop.com/>

While they are a bit expensive, you can earn the money you invested + profit just by buying 1 product. You'll see what I mean below.

Provided you actually purchased the bot, managed to purchase an item, now it's time to resell it.

That same Hooded Sweatshirt you purchased for less than **\$170**, is now being resold for

- **\$600** on eBay and other platforms.

Another popular site for hypebeast items is StockX and Grailed, take a look at the prices there:

STOCKX : <https://stockx.com/>

				
Supreme Bandana Box Logo Hooded Lowest Ask €538	Supreme Bandana Box Logo Hooded Lowest Ask €622	Supreme Bandana Box Logo Hooded Lowest Ask €584	Supreme Bandana Box Logo Hooded Lowest Ask €462	Supreme Bandana Box Logo Hooded Lowest Ask €447

Grailed: <https://www.grailed.com/>

\$500

+\$15 Shipping

Let's do a quick math there:

Let's say you invest \$80 in the bot and another \$180 in the Sweatshirt & shipping.

Your total investment is \$260.

You can **easily** sell that same t-shirt for \$600(A LOT more but let's use that as an example)

\$600 - \$260 = \$340 OF PURE PROFIT for doing 1-2 hours of work per week.

Method #3 | Instagram Shoutouts

This method also doesn't require any investment, other than a bit of research, and as always.. Dedication.

Here we will be selling Instagram shoutouts BUT don't worry, you're not going to grow your own account, spend hours upon hours getting followers, etc.

Here we will be selling shoutouts on other people's accounts, mark up the price and profit from it.

First step you have to do is find an account which you want to work with. Account size doesn't matter, it can be 10k followers, 100k, 1 million, 10 million, etc.

You're going to DM/email/contact them and ask for prices for shoutouts. Ask for:

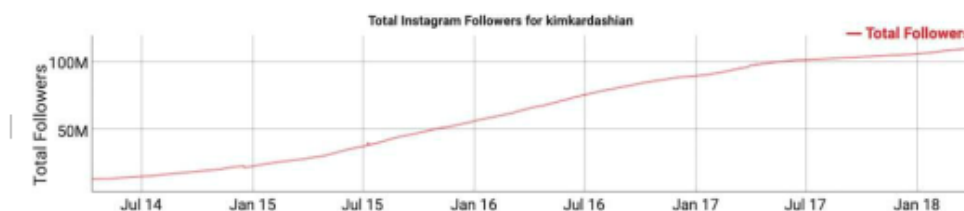

- 12 hour shoutout
- 24 hours shoutout
- Shoutout + story post
- Shoutout + link in bio
- Shoutout + story post + link in bio

After they give you the prices, write them down and move on to the next step.

Before contacting them, make sure you check their engagement as you don't want to work with an account which has fake followers, buys followers, likes, etc.

You can easily check engagement of a certain account using this site: <https://phlanx.com/engagement-calculator>
<https://socialblade.com>

This is how it should look like if person didn't purchase any followers:

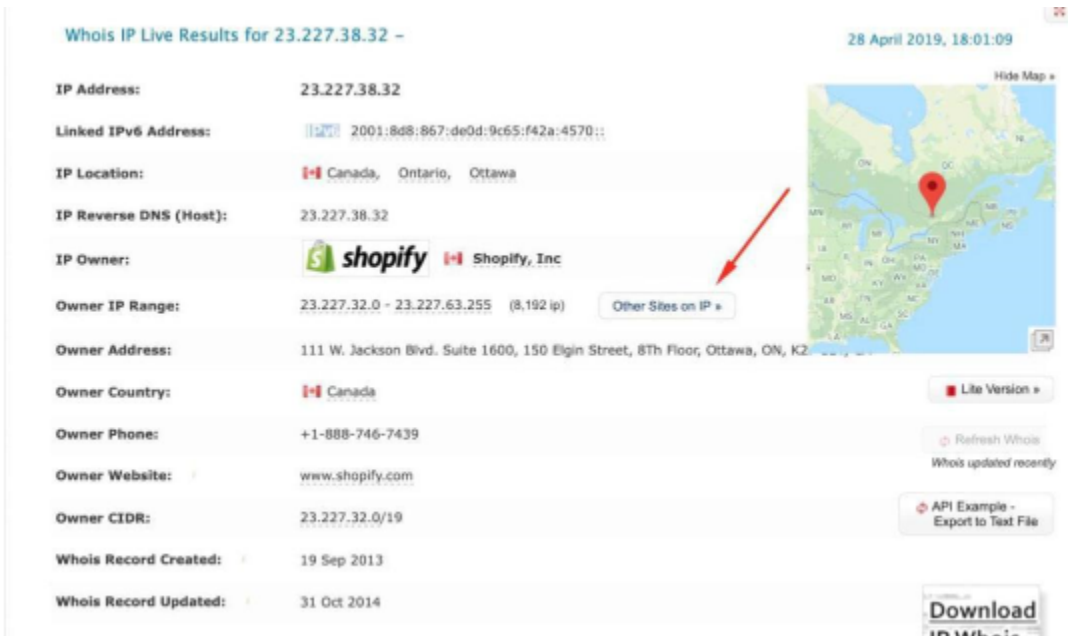

After you've checked their account to make sure they have a genuine following, you're going to find people/products/software/businesses which you are then going to email and offer them a shoutout. **Don't worry, I will show you step by step how you can do that.**

Head over to <https://myip.ms> and paste this address - 23.227.38.32. Then click on "Whois lookup"

Whois Lookup, Reverse Whois on 377,000,000 websites, 9,000,000,000,000+ ipv4/ipv6 addresses

[Our IP Address Information](#) [Our World Database](#)

Then click on “Other sites on this IP”:

The screenshot displays the 'Whois IP Live Results for 23.227.38.32' page. The page includes a table of IP details, a map of Canada with a red pin in Ottawa, and a list of other sites on the IP. A red arrow points to the 'Other Sites on IP' button.

Other Sites on IP

Download

After you've done that, you will see all websites which are powered by Shopify.

Those sites are e-commerce stores and people are buying from them.

You can see that there is very popular workout brand called Gymshark, extremely known clothing site called Fashionnova, and more.

But those sites are too big for us and we likely won't get any replies from them as they have a dedicated marketing team that is already advertising their products.

We're going to scroll down and click on "View all records":

Total: 133,324 records (show first 15 records only) [View All Records](#)

Now you're going to find a site which is in the same niche as the account we contacted for shoutouts. I contacted a survival account which showcases different survival tutorials, hunting products, etc, so I'm going to look for a store that is in that niche.

After a bit of research, I found this store: <https://jc-customflashlights.com>

Then I'm going to contact them and offer to promote their product on "my" page.

If the account you contacted said they will do a 24 hour shoutout for \$70, I'm going to contact JC custom flashlights and say how a 24 hour shoutout will cost them \$100. Explain the benefits of advertising on IG, how everything works, etc.

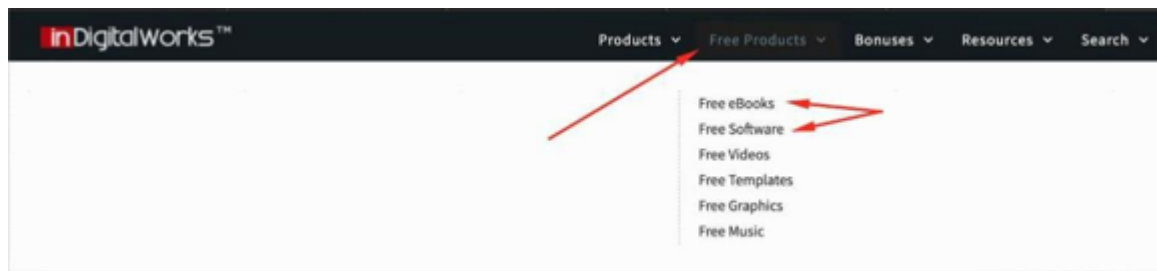

That's it, I made \$30 being the middleman and doing barely any work on my end.

Method #4 | Selling your own product

This is one of my favorite methods, since it needs some dedication, the eBay account requires an investment of \$ 0! You alone and a PayPal account.

If you don't have a PayPal account, simply create one (or buy one!). The same goes for the eBay account. If your eBay account has been banned in the past, simply create a new one with a new PayPal using VPN.

Now go to <https://www.indigitalworks.com/> and go to "Free products" section.

I recommend free ebooks & software but you can use videos, templates, graphics, music as well.

Now you will go to eBay (<https://www.ebay.com>) and register/login to an account.

Then we're going to sell the item we got from Indigital Works. I prefer eBay but you can definitely sell it on many other platforms, such as Craigslist, LetGo, Facebook group and so on.

****Bonus:****

I like to use influencers and affiliate marketing for this method. You will essentially find the people in the same niche as your product is in, contact them and offer them to sell your product for a commission.

Let's use this Copywriting software which gives you over 1,000+ fill-in-blanks which you can use for your internet business. This is especially good for copywriting freelancers who have an email list.

The screenshot shows a product page for 'Easy Copywriter Software'. On the left is a 3D rendering of a software box with the title 'EASY COPYWRITING SOFTWARE' and an orange feather logo. Below the box is a button that says 'Resell this product!' with the text 'Get access to this, and 12,590 more products which you can'. To the right of the box, the title 'Easy Copywriter Software' is displayed above two buttons: 'Download' and 'Preview'. Below these buttons, there is a paragraph of text: 'Software Gives You Over 1000+ Of The Best Fill-In-The-Blank Swipes You Can Instantly Use For Your Internet Marketing!'. This is followed by two more paragraphs of text describing the benefits of the software, such as 'Content is KING' and 'Articles are still effective nowadays'. The final paragraph states: 'The good new is that inside this amazing product is a software that you can use to just fill the blanks with the necessary information that is relevant to your offers. See it inside.'

While you probably wouldn't purchase this, there are copywriting enthusiasts who are looking to expand their knowledge and would gladly pay for that software.

I found this copywriter on Twitter (he is probably building his personal brand) and I can simply email him and offer him to promote my product to his audience.

My product = **copywriting** software

His account = **copywriting** niche

His audience = **copywriters**/ people who **want to become copywriters**.

See what's going on? My product is perfect for them, and everyone wins.

You make money (without any investment), influencer makes money (commission) and people who buy get the software which helps them become better copywriters.

I used this as an example, you can do any niche, product, software, etc. **It's not hard at all, I just did it in front of you.**

- *He will see you're on his list which will boost your chances of working with him.*

Method #5 | Bitcoin Reselling

This method is extremely beginner friendly and can be used to earn some side income, maybe to invest in another business, or something like that.

Nature of the method is very basic, you're going to be buying low and selling high.

First of all, you're going to find a website which sells Bitcoin for 0-5%. This can be done on a lot of websites but below I'll link some of my favorite.

<https://www.coinbase.com>

<https://www.coinmama.com>

<https://www.bitstamp.net>

<https://changelly.com>

<https://www.coinigy.com>

Then you're going to open a wallet at <https://www.blockchain.com> (or can use any other online/offline/hardware wallet) and you're going to **enable 2FA and email verification**

If you don't know how, please read this:

<https://support.blockchain.com/hc/en-us/articles/211164103-Enable-2-Step-Verification-2FA->

<https://www.blockchain.com/learning-portal/security>

After you've done that, then you're going to buy Bitcoin and send it to your Blockchain wallet.

For better explanation, you can read this article by Blockchain:

<https://www.blockchain.com/learning-portal/wallet-faq>

Then you're going to navigate to LocalBitcoins and you will register an account

there: <https://localbitcoins.com/>

Make sure **you secure your account with 2FA. Never give out your 2FA code to anyone, either on LocalBitcoin or Blockchain!**

As you can see, rates on LocalBitcoins are awesome for sellers:

Trader	Payment method	Price / BTC	Limits	
mdbutler_71 (30+; 96%)	Paypal	10,417.71 USD	500 - 200,000 USD	<button>Sell</button>
svsash (100+; 100%)	Paypal	10,355.33 USD	300 - 50,000 USD	<button>Sell</button>
nikibctrader (500+; 100%)	International Wire (SWIFT); ALL	10,269.27 USD	1,000 - 35,283 USD	<button>Sell</button>
Mnjega (1000+; 100%)	Paypal	10,103.45 USD	500 - 10,000 USD	<button>Sell</button>
zeya0012z (3000+; 100%)	Paypal	10,066.13 USD	15,000 - 180,000 USD	<button>Sell</button>
BTC_LONG (1000+; 99%)	Paypal	9,842.23 USD		<button>Sell</button>
MERCABIT (1000+; 100%)	Paypal	9,804.92 USD	100 - 170 USD	<button>Sell</button>
HUGORAFA (1000+; 100%)	Paypal	9,795.59 USD	50 - 600 USD	<button>Sell</button>

At the time of writing this, price of 1 Bitcoin is \$9.339 and on LocalBitcoins, it's selling for \$9,700- \$10,500.

Let's do a quick math here..

If we buy \$100 worth of Bitcoin for 4%, that is going to cost us \$104. Then, we can go and sell that same Bitcoin on LocalBitcoins for 10-17% fee.

Meaning we will get paid \$110 - \$117 for \$100 in Bitcoin. **That is around \$10 profit for \$100 purchase.**

That is an extra \$300/month by doing almost nothing. Setup your listing on LocalBitcoins (you can even purchase an account which has positive feedback) and leave it. Once someone opens a trade with you, fulfill it and that's it.

Obviously, if you were to invest more, you would profit more. Invest \$1,000 and buy at 4%, you will pay \$1,040. Then you can go ahead and sell that same BTC

for \$1100 - \$1170. **Which is around \$100 - \$120 profit.** Remember, the more you invest, the more you will earn.

Method #6 | Fiverr

We all know that almost every entrepreneur/company/small business needs a logo and/or a website. They have a lack of knowledge, and that's where we are going to work with. We must find these people and offer them what they need.

HOW MUCH DOES LOGO DESIGN COST?

The cost of a logo design is anywhere from \$0 to tens of thousands of dollars, but if you are a business or startup looking for quality design, a good logo design should cost between \$300-\$1300.

Do you see what I see? An average logo is around 300 to 1300 dollars, and an average website is around 5,000 to 10,000+ dollars. Now it's time to write down a plan.

The plan

In order to find what we are seeking, we need to write down a plan. What do we need to proceed with earning money?

1. Companies/individuals/entrepreneurs looking for a logo / website.
1. Contacts that design / build a logo or website. -> should be very cheap, will tell you more about it soon.
1. Investment (not necessary, but would make the process easier. I am not talking about an investment of thousands of dollars, but more investment of \$20-50).

Find the right customers

1

Google	inurl:buying a logo
Google	inurl:need a logo
Google	need logo site kijiji.ca
Google	need website kijiji.ca
Google	need logo site craigslist.co.uk
Google	looking for logo site craigslist.com

- Communities

There are a lot of community forums. Let's take CRACKED and nulled for an example, these are nothing compared to alternatives. You can post your service on all forums.

- Approach companies

The best way this method worked for me is approaching companies in my area. I went to random companies and offered them my services. 3 of the 10 agreed with the given price.

- Mail companies

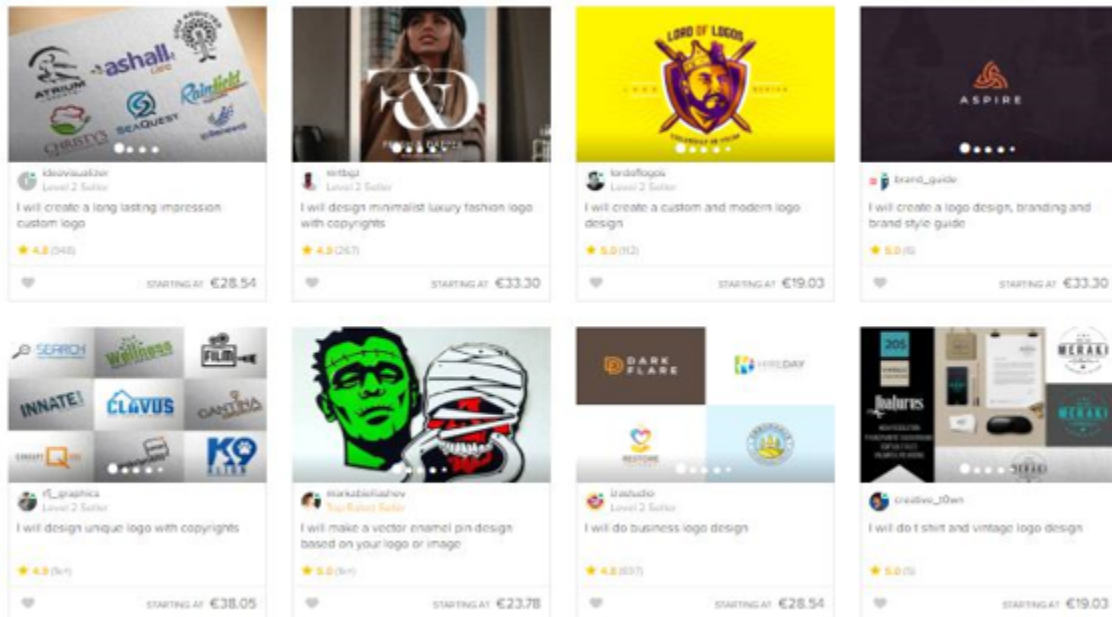

Same story as above, approach companies but instead of going to them, send them an e-mail with your services.

Now you're thinking on how to create a logo or develop a website without any knowledge, here comes the best part!

Final step

Now that we found a customer that looks for a website and/or logo design we need to bring the product to them. For this step you need to create an

account on fiverr.com – The cheapest website on the market where you can buy a website and logo for a very cheap price.

Do you see the prices? These are quite cheap, because you will ask \$100-200 for a logo. What does that mean?

Investment: \$30

Customer pays: \$150

Profit: \$150 - \$30 = \$120,00

Repeating this steps could make you monthly income over \$4,000.
You can even double it by doing more orders at once.

Method #7 | Quora Payments

We are going to use the website Quora(<https://www.quora.com/>) to make money. Now you're probably wondering, "how the fuck am I supposed to make thousands with this website?".

Well, we're going to use Quora's special [partner program\(https://help.quora.com/hc/en-us/articles/360000673263-Partner-Program-Frequently-Asked-Questions\)](https://help.quora.com/hc/en-us/articles/360000673263-Partner-Program-Frequently-Asked-Questions), which will pay us

huge amounts of money for bringing high quality traffic to their website. Additionally, we're going to add our own little twist and "cheat" the system, which means that we will not be using this method in an ordinary way. Without further ado, let's get started with the guide.

Setting Up

First of all we'll have to get invited to Quora's partner program. Unfortunately, there's no real way of entering Quora's partner program, you'll have to get invited. This shouldn't be a problem, since getting into Quora's program won't take you months or years.

In fact, there are no real requirements, a lot of people who got invited to Quora's program never even posted a question, you just have to own an account for a week and you might get an invite, it's that easy.

As for me, I opened an account, posted 2 questions and answered some questions and after a week I've received the email, it's that easy, you just have to be patient.

Note: If you have an old account in Quora, check your email, Quora might've sent you an invitation.

Additionally, the program is limited to the following countries only: U.S., Japan, Germany, Spain, France, United Kingdom, Italy, Canada, Australia, Indonesia, India and Brazil.

What does that mean? If you don't live in one of these countries (like me), just use a VPN. To receive your invitation start answering & posting questions, it'll take a week or so.

Once you have your partner account, don't forget to set your payout option!

Asking Questions

If you think that this part is "tricky", it's not. Although it can be considered as the "hard part", it's super straightforward and easy to understand.

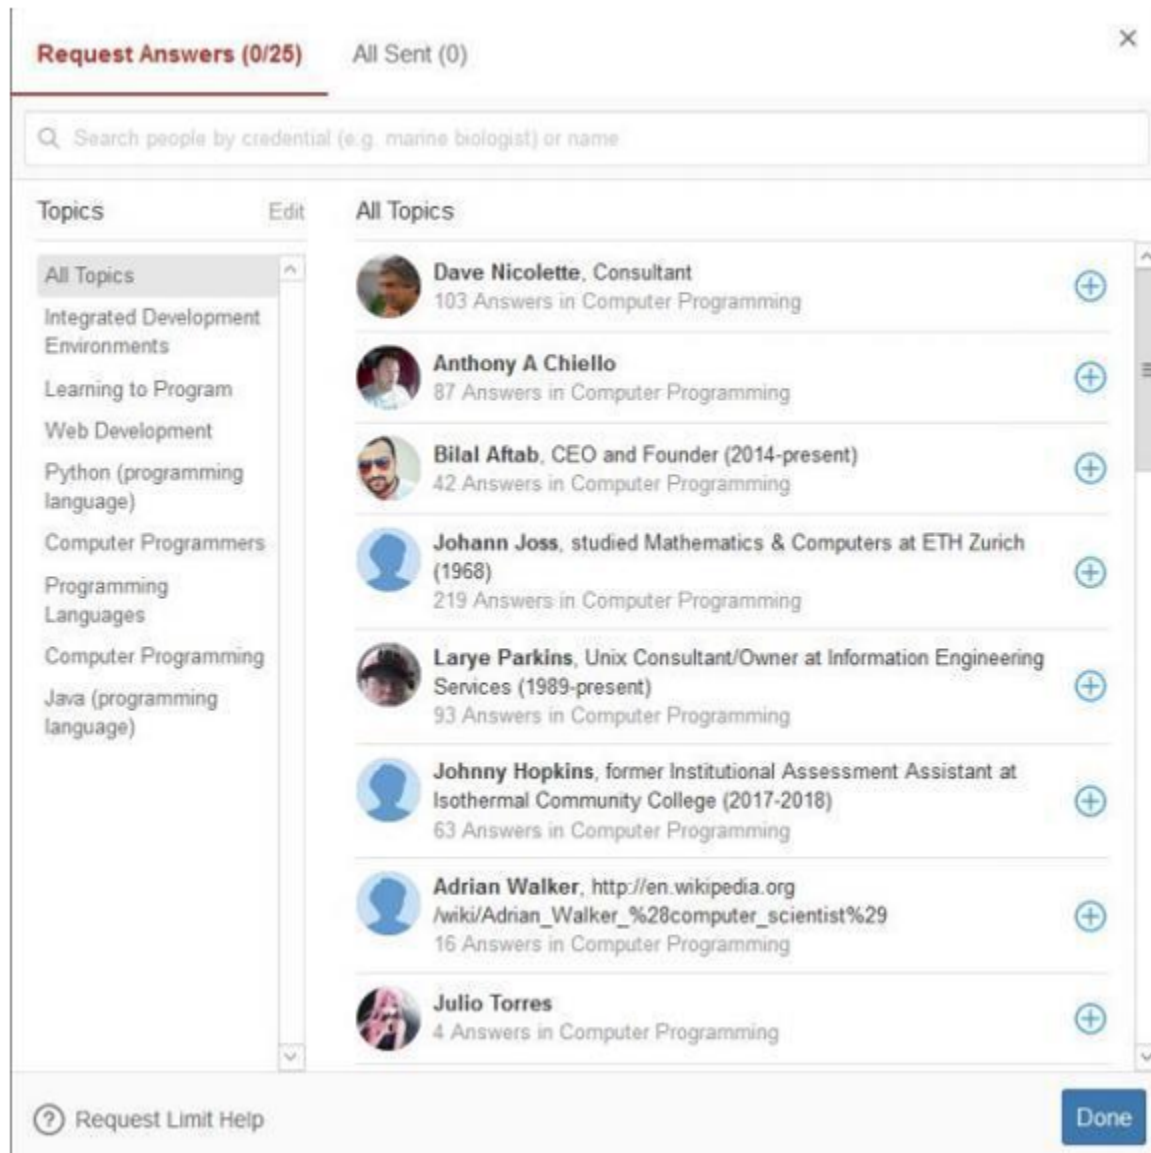

Step 1: Post a question.

That's it, just think a question that no one posted before. You can take questions from places like /r/askreddit or even Cracked's lounge.

Step 2: Request answers.

Once you post a question you'll have the option to request answer.

This step is extremely important. Here is an example:

Look for people that might be able to answer your question, I usually send 25 requests per day because having HQ answers are extremely important. It's best to send requests to people with the most answers.

Now that you have a question you must wait. Send answers each & every day to different people until you have around 500~ views on your question. Once you've surpassed 500 views you're ready to move to the next step; the most profitable step in the method.

Are you sending requests daily and you're still stuck on less than 500 views? Your question might be not good enough, try posting a different question. I recommend to do this process with multiple questions.

Cheating The System

This step will turn your \$5 question to a \$200+ question.

Now that you have your perfect question, we need to get HQ traffic, this will be obtained with a special website that is called SEOClerks.

SEOClerks is the best way to obtain HQ and organic traffic, which is exactly what we (and Quora) need.

<https://www.seoclerk.com/search/adsense>

It is best to search for "AdSense" traffic because this is the safest traffic source we can get. It is also important to find a trusted traffic provider.

You also want traffic from US or Europe, traffic from countries such as Brazil or India are useless for us.

I usually spend around \$1-\$2 per question to get \$200. Don't spend too much money, we don't want to be too suspicious, that's why \$2 is more than enough.

Now let's do the math...

Now that we have 1 question and \$2 to invest, we expect to make at least \$200, which means that will multiply our investment by 100x, isn't it crazy?

ENDS

Thanks For Buy this Ebook!

Happy Earnings!

Akimor's.
